DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2,3,7 and 1,16 in part , drawn to compounds and pharmaceutical compositionsof formula Ia ,Ib and VIII, classified in class 546 , subclass 61.
- II. Claims 4 ,8, 11 and 1 ,16 in part, drawn to compounds of formula II , III , IX , classified in class 546 , subclass 43
- III. Claims 5, 6 and 1, 16 in part , drawn to compounds and pharmaceutical compositions of formula IV, V, VI and VII, classified in class 546 , subclass 44.
- IV. Claims 9 , drawn to compounds and pharmaceutical compositions of formula X , classified in class 546, subclass 38.
- V. Claims 12 , 13 and 1, 16 in part , drawn to compounds and pharmaceutical compositions of formula XI and XII , classified in class 546, subclass 62.
- VI. Claims 14 and 1 ,16 in part , drawn to a compound and pharmaceutical compositions of formula XIII , classified in class 546 , subclass 61.
- VII. Claims 15 and 1, 16 in part , drawn to compounds and pharmaceutical compositions of formula XIV, classified in class 546 subclass 79.
- VIII. Claims 17 , drawn to a method of treating pain , classified in class 514 and various subclasses.
- IX. Claims 18 –20 , drawn to method of treating dopamine dysregulation disease, classified in class 514 and various subclasses.

Art Unit: 1625

- X. Claim 22, drawn to a method of synthesizing the various compounds, classified in class 546 and various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a different core structure as given by the different formulas and classification. They have different bonding and properties.

Inventions I-VII and VIII and IX are related as products and process of using these products.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case there are several other drugs that can be used to treat pain and the other diseases such as depression and addiction and so on.

Inventions I-VIII are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

Art Unit: 1625

In the instant case the synthesis is so generic that it can be used to make compounds of different formulas as given in the different inventions given above.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II to VIII Restriction for examination purposes is indicated to be proper.

A telephone call was made to Mr. Paul Clark on 12/30/04 and 1/21/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

If applicant 's traverse on the grounds that the inventions are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the groups

Art Unit: 1625

to be obvious variants or clearly admit on the record that this is the case. In either instance if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Applicants preserve their right to file a divisional on the cancelled non-elected claims without prejudice in due course.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rita J. Desai whose telephone number is 571-272-0684. The examiner can normally be reached on Monday - Friday, 9:30 am to 6:00 pm.
